*Upgrade your vacuum system and process performance*

**Also a lower cost, plug-compatible, direct drop-in replacement gauge for Granville-Phillips® Convectron® and gauges**

*Significant savings for you  
No changes to your system  
Use your existing Convectron® controllers, cables, and modules*

**The InstruTech CVG101 Sensor**

The CVG101 Worker Bee™ convection vacuum gauge sensor incorporates numerous design enhancements compared to other traditional convection vacuum gauges.

Other design features include reduced internal volume and significant reduction of internal surface area resulting in faster pump-down and less outgassing. A fine mesh screen in the gauge inlet port helps prevent particulate contamination from entering the gauge. The gauge is shielded against RF interference.

Temperature compensation has been moved out of the vacuum environment and placed around the outside of the vacuum gauge tube. This has eliminated a dozen or so unnecessary parts and welds, significantly increasing the reliability, providing optimal vacuum measurement while reducing cost. The improved mechanical strength results in a highly robust vacuum gauge less susceptible to mechanical shock and vibration.

These, and other, design features add up to a highly reliable vacuum gauge with significant cost savings that are passed on to the user.

**Upgrade for thermocouple TC vacuum gauges**

The CVG101 Worker Bee provides a wider measuring range than traditional thermocouple vacuum gauges - from 1 x 10<sup>-4</sup> Torr to above atmosphere - so you can monitor your entire pump- down and vent cycle.

The CVG101 Worker Bee convection enhanced Pirani gauge is more accurate than a thermocouple gauge, especially at lower pressures.

**Also a Low cost drop-in replacement for the Convectron® Gauge**

The CVG101 Worker Bee can also directly replace the Granville-Phillips® Convectron® sensor, at significantly lower cost.

The sensor connector has the same pinouts and signal as the corresponding Convectron®. It is directly interchangeable with your existing Convectron® controllers, cables, so you don't need to change any wiring, hardware, or process recipes. With Worker Bee's performance, more robust design, longevity, and lower cost, your process will only improve.

The InstruTech CVG101 Worker Bee convection vacuum gauge provides equivalent or better performance throughout the range of 1 x 10<sup>-4</sup> to 1,000 Torr. Only the same, equivalent, or better materials are used in the vacuum environment. Clean assembly procedures assure compatibility with today's contamination-sensitive processes. All tooling that comes in contact with vacuum surfaces of the InstruTech gauge are of very low vapor pressure materials.

*Guided by our vast experience and vacuum measurement know how, InstruTech sensors are specifically designed for optimum reliability and performance. Whether you're looking to reduce costs or improve your process, the CVG101 Worker Bee offers a cost-effective solution for your vacuum gauging needs.*
