

# H8SX,H8S,H8 C/C++ Compiler Package V.6.02 Release 02

Issue Date : 2009/12/21

## Description

C/C++ Compiler Package for H8SX, H8S, H8 families has been upgraded to V.6.02 Release 02. Contents of the revision can be checked in [Tool News](#). Additionally, you can get detailed information on the product on [this product site](#).

Please download the update program below to update your product from V.6.0x Release 0x to V.6.02 Release 02.

## Notes at installation:

### (a) In case of using on High-performance Embedded Workshop

If you open the existing project (created by V.6.0x Release 0x) on HEW, the toolchain version is still old. Please select HEW menu: [Tools]-[Change Toolchain Version], and change the [Available versions] to "6.2.2.0" .

### (b) In the case of using on command line

If you updated the program, Toolchain is installed into [<Hew install directory>\Tools\Renesas\H8\6\_2\_2] by default setting. Please change a path and an environment variable according to a situation.

The URLs in the document may be subject to change or become invalid without prior notice. If you have any questions or concerns, please contact us [here](#).
