PETG FP

INNOVATEFIL® PETG FP is a product based on Copolyester Glycol (PETG), modified with flame retardant additives, complies with the V-0 specification according to the UL94 standard, flame-retardant polymer based on halogens and red phosphorus.

Fireproof

NOTICE: The information provided in the data sheets is intended to be for reference only. It should not be used as design values or quality control. Actual values can differ significantly depending on printing conditions. The final performance of printed components not only depends on the materials, design and printing conditions are also important.
