

DELO-DIV VD450

High-precision application, coordinated turnkey solution

DELO-DIV VD450 is the more compact and lighter model from the new range of DELO's volume dispensers. Thanks to the endless-piston principle, it provides exceptional dispensing precision, regardless of the medium's viscosity. Its slightly smaller dimensions make it suitable for production systems with limited space and, with a minimum dispensing volume of 4 μ l, it is ideal for miniaturized applications.

Technical data

Dimensions	\varnothing 33 mm x 228 mm
Media viscosity	Aqueous to pasty
Volume flow	0.5 – 6.0 ml/min
Min. dispensing volume	0.004 ml
Dispensing precision	\pm 1 %
Material input	G 1/8" DIN/ISO 228
Material output	Luer-Lock (patented)
Repeatability	> 99 %
Weight	300 g
Product compatibility	DELO-DIV pilot 1T / 1i
