

ADHESIVES DIVISION

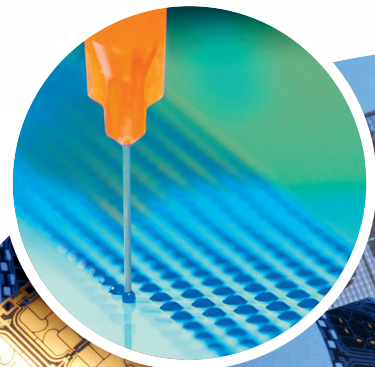

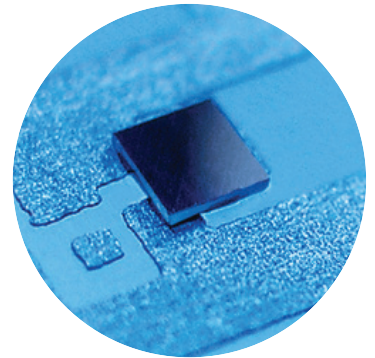

A comprehensive range of technical adhesives and sealants for the automotive, electronic and general manufacturing industries.

Products include an extensive range of UV cured or light activated Epoxies and Acrylates, dual curing (heat & light, humidity & light) adhesives, light / Anaerobic curing Adhesives, two-part Polyurethanes, one- & two-part Epoxies, Cyanoacrylates and one-part Silicones, plus dispensing and curing equipment.

Providing technically advanced adhesives and exclusively representing DELO Industrial Adhesives, our product specialists can advise on all your bonding, sealing & encapsulation requirements.

Supplying the UK and Ireland, Inseto aims to exceed customer expectations and is committed to a policy of continuous improvement throughout the company.

Inseto's other product divisions comprise semiconductor Wafers, Equipment and Materials for device fabrication, assembly and test.
